Mr. Richard Miller, President
Resource Environmental, Inc.
13100 Alondra Blvd., Suite 108
Cerritos, CA 90703

Dear Mr. Miller:

**404 N EUCLID AVE DEMOLITION PROJECT AND THE GRAND PARK DEMOLITION PROJECT
LETTER OF PERFORMANCE**

This letter is to express the appreciation that the City of Ontario has for the excellent work performed by Resource Environmental, Inc. (RE) on the 404 N Euclid Ave and the Grand Park Demolition Projects. The team from RE was unmatched with their professionalism, expertise, dedication, and value engineering.

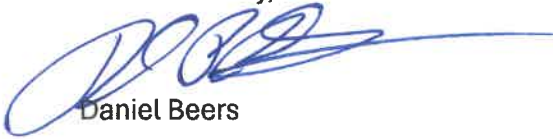

The Grand Park Demolition Project involved a great deal of hazardous material abatement and coordination with South Coast Air Quality Management District (SCAQMD), along with demolition of several structures on the site. RE was aware of the "big picture" and proposed several value engineering solutions that reduced the cost and delivered the project early.

404 N Euclid Ave Demolition Project included abatement and demolition of several structures that encompassed an entire block. Once the demolition was completed, the scope included construction of a temporary parking lot. From pre-construction through construction, RE provided outstanding service. Without any existing as builts, we came across several unforeseen conditions. RE approached these with professionalism and provided value engineering that reduced the cost and the impact to the schedule. With these unforeseen conditions, RE was able to finish the project on schedule.

Their team is dedicated to safety, professionalism, and customer service. We highly recommend RE for any future project that would require their expertise and skill set. They have proven the ability to deliver high quality projects on time and on budget. RE is a true partner on any project.

If you require any further information or clarification, please do not hesitate to contact us.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Daniel Beers', with a long horizontal flourish extending to the right.

Daniel Beers

Principal Project Manager
